

Information School Licenses

Below you can find all the necessary information about our school and student licenses.

School Contract

If a school/university wants to work with KISSsoft/KISSsys, there must be a signed school contract.

The contract includes mainly two points:

- Non-commercial use
- Supervision of students (Access to software, licenses) only through the school/university, also valid for Internship workers / working students etc.

The contract can be found as pdf download on our homepage at Prices → Academies/Students → College contract. The signed contract can be sent by fax, e-mail or post to Mrs. Nina Hüppi (nina.hueppi@KISSsoft.AG).

KISSsoft School portal

Once the contract has been signed, to school will be registered on the school portal with the obligation to use and maintain it. Professors and assistants have the possibility to download the software and the requested license files directly from there.

We also create a personal login for the defined primary contact. There is also a possibility to add contacts and adapt the authorizations.

The KISSsoft school portal is not accessible for students. Only the responsible person from the school can request the student licenses directly from there.

KISSsoft Homepage

All universities which are using KISSsoft are listed on our Homepage. Other public information can be seen under „SHOW“ like for example contact person who must be contacted from the student to obtain a student license.

The text which is displayed on the KISSsoft Homepage can be found and modified under „change public page“ on the school portal.

KISSsoft Licenses

KISSsoft AG offers three different licenses which can be used by all the school. These KISSsoft licenses are full versions from KISSsoft, also the CAD interface is included and can be used.

1) Network License (License 261)

This license is for the usage in a computer room, where the students have access to. To create the license file, we need to get an access directory and a hardware code of the server which will host the license. These information can be found and selected in the KISSsoft menu. The installation instructions can be found on our homepage at: Downloads → Installation → PDF-Installation Floating License (Network)

2) Single License (License 262)

This license is for the lecturers of an institute who are working independently of the schools network. Several lecturers can be entered. For that we need the hardware code from the computer where the license is used. The hardware code-/s can be sent by email to info@KISSsoft.AG so that we can generate the license file.

3) Student License (License 581)

The student version is valid for one year. The students are receiving a student license mostly through their lecturer. The lecturer can request the activation codes from KISSsoft. KISSsoft is sending an excel file (link to download the software and activation code) and the license file to distribute.

The codes are normally valid during 50 days. After this time the codes and links expire.

Installation and Activation of the student license

The student receives a license file 581, also a download link and an activation code from the lecturer. After the installation the license file needs to be copied in to the subfolder of the KISSsoft Installation version / license. Then the version needs to be activated.

Information for the students

The lecturer should share this information with the students.
